

Planning learning

This worksheet will help you think about your cascading questions and what you'll do to learn about them.

Lines of inquiry

What are your high-level project questions or mysteries? You'll typically have between 2 and 5.

Sub-questions

What are the handful of sub questions under each of those?

How will you learn?

What activities will you undertake to investigate those questions?
Will you interview people? Who? Stakeholders? Experts? How many? For what purpose?
Will you dig into data? What data? Why?
Will you explore the literature? What topics and for what purpose?
Will you try to learn from existing or lateral solutions? Which ones?
Will you give something a go on a small scale? What is it? What would you hope to learn?
